WASTE STREAMS TO BE COLLECTED AND RECYCLED

	Storage Capacity	Anticipated Monthly Volume	Price*
USED OIL			
USED ANTI-FREEZE			
USED OIL FILTERS			

* Pricing subject to market conditions.

This is an agreement providing for the collection by Universal Lubricants, LLC (UL) of non-hazardous used oil, anti-freeze, used spin-on oil filters and used sock/cartridge oil filters (here after referred to collectively as the "Waste Streams"). The customer agrees to utilize UL during the term of this agreement as the exclusive collector of the non-hazardous Waste Streams and to pay the fees, costs and other expenses described herein.

Participation in this recycling program for used oil, used anti-freeze, and used oil filters is contingent upon meeting the following requirements:

1. Used oil and/or anti-freeze shall contain no foreign and/or inappropriate materials or substances or contaminants in an amount which would classify these wastes as hazardous wastes under all applicable regulations.
2. Used spin-on oil filters can only be automotive oil filters enclosed in a non-terne plated steel casing that have been drained or crushed to remove excess oil.
3. UL shall only accept title to the used anti-freeze upon completion of an analysis that shows the used anti-freeze to be non-hazardous. UL's determination as to whether the waste stream is non-hazardous shall be conclusive.
4. In the event that any waste stream is found to be hazardous, UL will properly dispose of these materials (and all waste streams contaminated by it) as hazardous waste requiring the customer to be responsible for all expenses incurred in this disposal.
5. Customer warrants that he or she shall not offer to UL for collection, any waste streams that are hazardous or that are contaminated with foreign and/or inappropriate materials.

Customer has read and agrees to the terms and conditions of this agreement.
